

Validation Rules not in LIS

Learner Information Suite 18.01

August 2010

Purpose

This document highlights differences between the set of validation rules used in the Learner Information Suite 18.01 and On-line Data Collections (OLDC) using version 4 of the validation rules published by the Information Authority on 01 July 2010.

Validation Rules in OLDC but not in LIS

The following validation rules exist in the OLDC validation engine but not in LIS and as such they will only be reported by OLDC. They may be missing from LIS because certain functions that the validation rules support do not exist in the LIS or data necessary for the execution of some validation rules cannot be held in the LIS.
